WORLD CLASS MODEL MAKING SERVICE

FULL PORTFOLIO ON 
www.odkmodels.com

VISION

To be a globally recognized leader in model making, transforming ideas into world-class scale models that inspire, communicate, and shape the future of design and development.

MISSION

To create high-quality, precise, and visually compelling scale models that help clients showcase, understand, and present their projects with confidence.

VALUE

We are committed to excellence, precision, innovation, integrity, and client satisfaction in every model we deliver.

ABOUT US

LEADERS IN WORLD CLASS MODEL MAKING

Precision without compromise

Born in West Africa and trusted by clients around the world, ODK Models has grown from a regional pioneer into an internationally recognized architectural and industrial model-making company serving masterplanners, architects, developers, and institutions across multiple continents.

By combining artisanal craftsmanship with advanced digital fabrication technologies, including high-precision 3D printing, 5-axis CNC milling, laser cutting, and automated mechanical systems, we transform visionary concepts into immersive physical experiences.

Our expertise spans masterplan, industrial, futuristic, real estate, high-rise, transport and civic, interior, interactive, and smart models, each engineered to communicate design intent, inspire stakeholders, and command attention in boardrooms, exhibitions, and global project presentations.

Operating from our Lagos innovation hub, ODK Models delivers world-class scale models seamlessly to clients across Europe, the GCC, Sub-Saharan Africa, and beyond. Through precision engineering, meticulous quality control, and reliable international logistics, we bring ambitious visions to life at any scale, anywhere in the world.

OUR CLIENTS

Designed in Nigeria. Delivered Globally.

ODK Models is an internationally recognized architectural model-making company with a legacy of excellence since 2015. Trusted by renowned architects, developers, and institutions, we create museum-grade physical models that communicate vision, accelerate decision-making, and elevate project presentations.

With proven track record of project delivery in diverse global locations, surpassing competitors in geographical reach, ensuring every model arrives with its precision, quality, and architectural integrity uncompromised.

Whether it is a landmark development in Africa, a high-rise proposal in the Middle East, or a masterplan presented in Europe or North America, ODK Models provides clients worldwide with a tangible representation of their most ambitious projects.

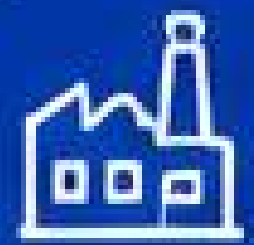

*Faster turnaround, faster delivery,
straight to your doorstep.*

FIMB PLAZA

YEAR: 2026

SCALE: 1:75mm

CONTEXT: High-Level Commission

FIMB Plaza is a modern commercial development in Abuja, strategically positioned at the heart of Nigeria's capital, reflecting influence, prestige, and a strong architectural identity.

Our architectural model captured the building's massing, façade detailing, and spatial composition with precision, emphasizing its balance of modern design, functionality, and institutional presence.

Official presentation of the FIMB Plaza architectural scale model to former President of the Federal Republic of Nigeria, Chief Olusegun Obasanjo.

PRESTIGIOUS HEIGHTS

YEAR: 2026

SCALE: 1:75mm

FEATURE: Interactive touchscreen system

Prestigious Height is a 20-floor luxury residential development by Prestigious Homes, represented through a precision-crafted architectural model at a scale of 1:75 and a footprint of 1200mm × 1200mm. Designed to showcase the tower's architectural character and spatial planning, the model is enhanced with an interactive touchscreen system, creating a dynamic and immersive presentation experience.

Official Presentation of the Prestigious Height Project

DBN HQ

CLIENT: Development Bank Of Nigeria

YEAR: 2025

SCALE: 1:100mm

CONTEXT: Commercial / Financial Institution

Prestigious Height is a 20-floor luxury residential development by Prestigious Homes, represented through a precision-crafted architectural model at a scale of 1:75 and a footprint of 1200mm × 1200mm. Designed to showcase the tower's architectural character and spatial planning, the model is enhanced with an interactive touchscreen system, creating a dynamic and immersive presentation experience.

COPENHAGEN ATOMICS

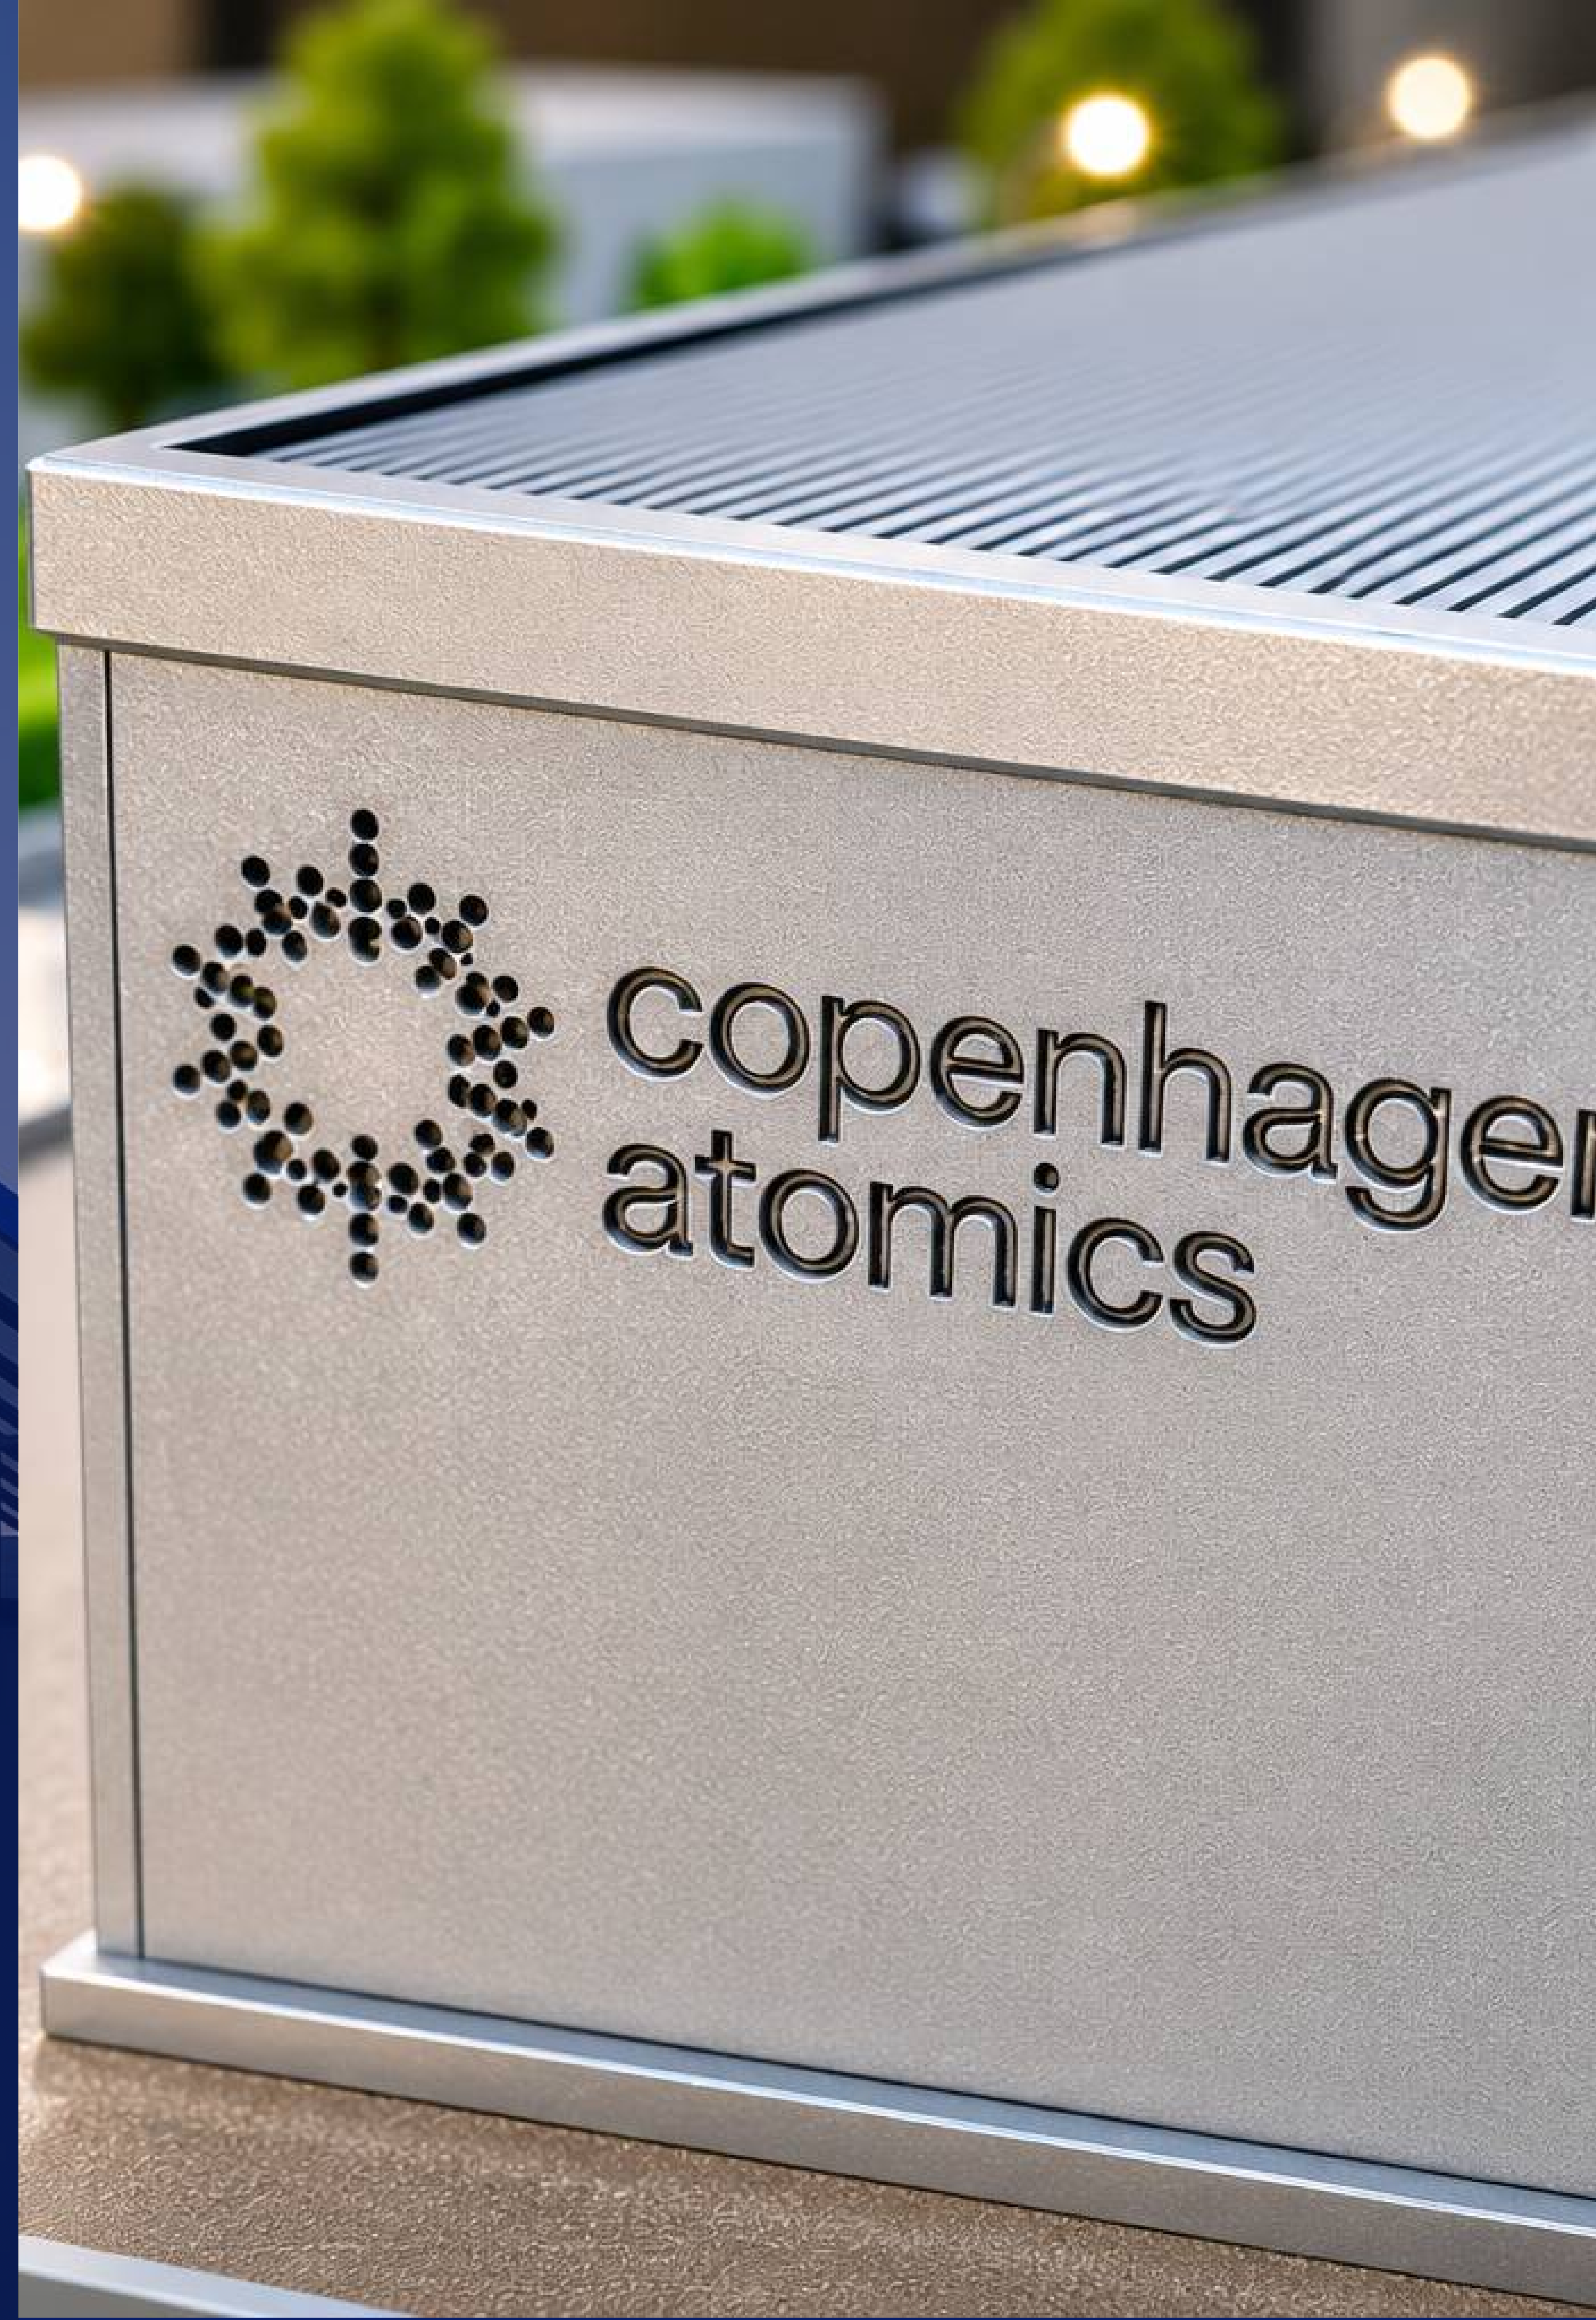

YEAR: 2024

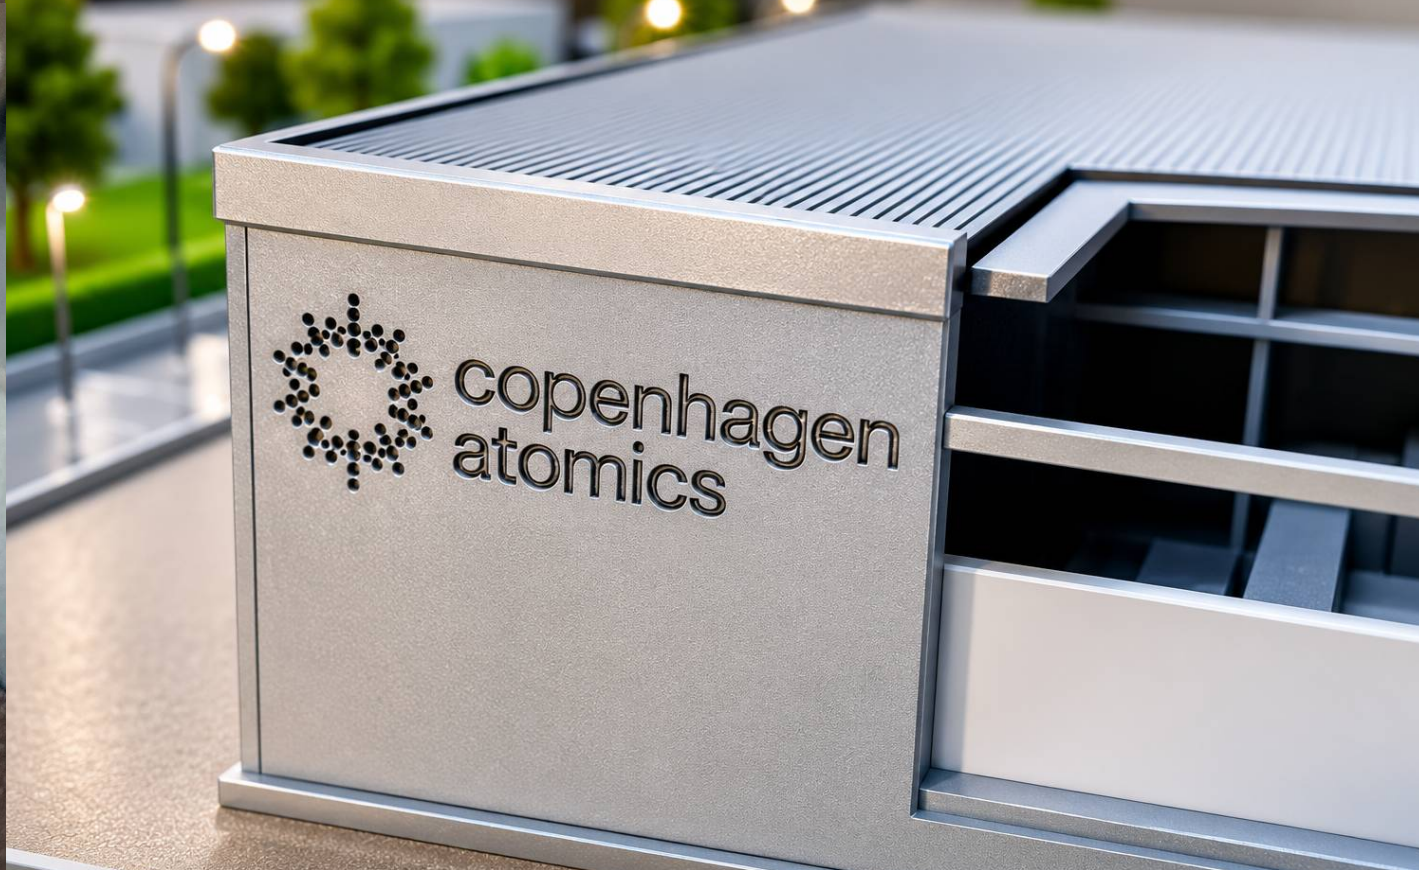

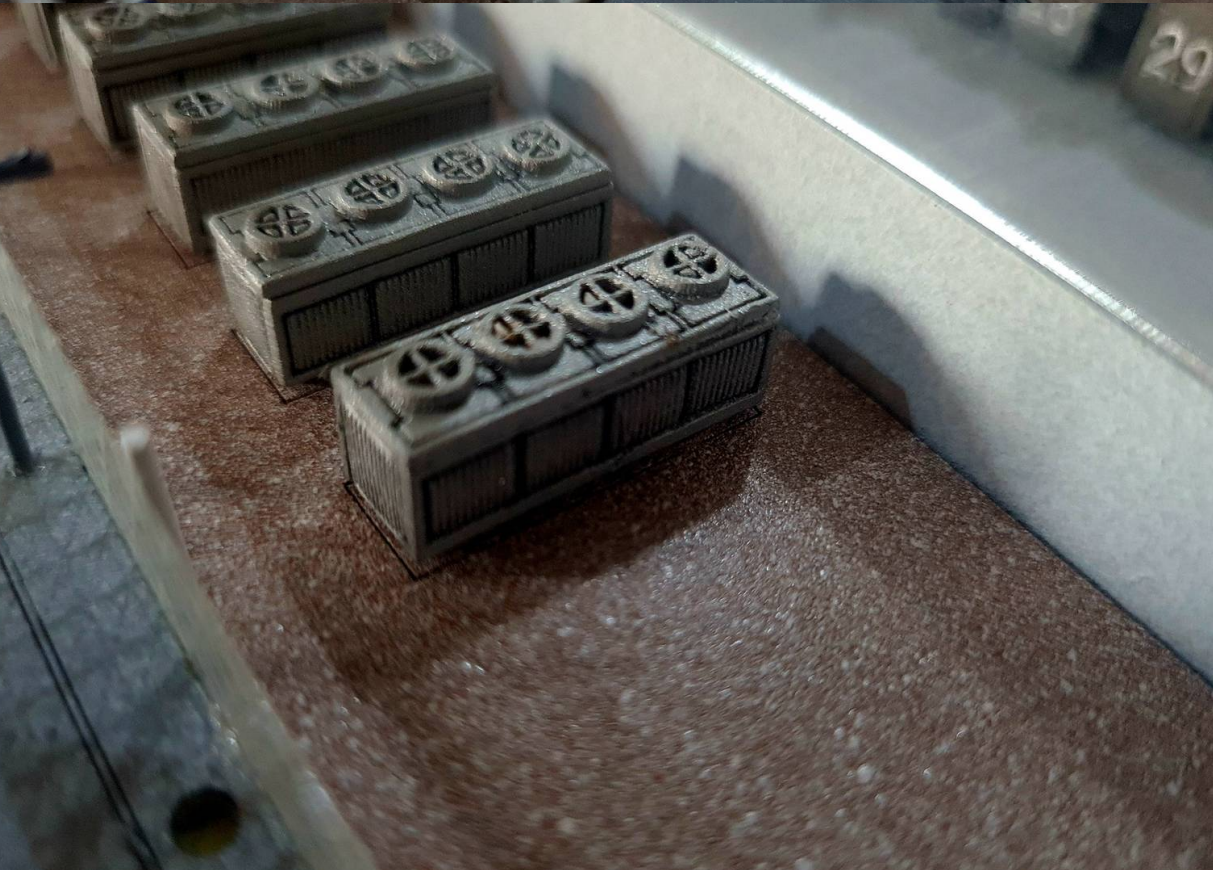

SCALE: 1:400mm

CONTEXT: Clean Energy R&D

A cutting-edge research and development environment centered on global innovation in clean energy and compact nuclear technologies. Commissioned for international exhibition spaces, this project required translating highly complex, advanced engineering concepts into a clean, modern, and accessible visual context.

The structural layout details the integration of modular reactor development frameworks within a scalable, highly secure production facility, bridging the gap between visionary high-velocity engineering and real-world global energy infrastructures.

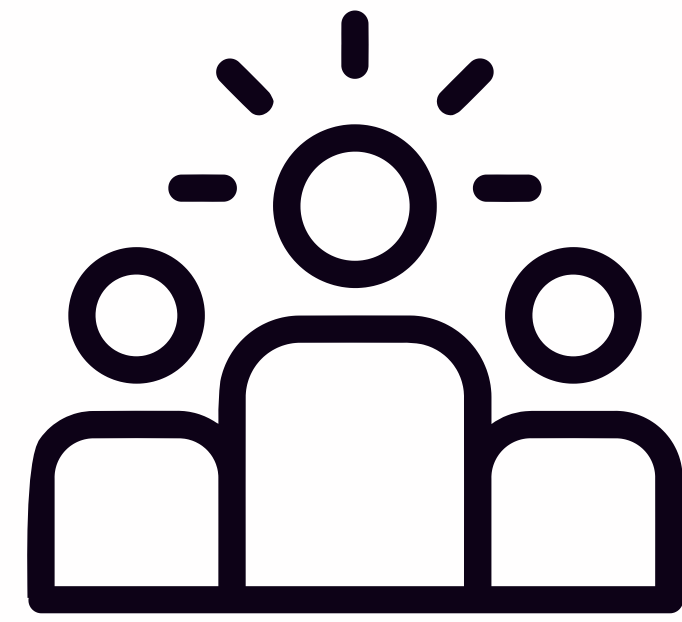

Why **choose** us ?

11 Years. One Standard

Since 2015, we have completed 100+ models for developers, architects, and corporations across continents

Dedicated Team

Skilled professionals working together to provide the best results for every requirement.

On-Time Delivery

Quality Focus

Commitment to maintaining high standards in every service, ensuring dependable results.

Global Project Expertise
